RESTful Id-WSF Security v0.6

<http://private.projectliberty.org/confluence/download/attachments/131148/RESTfullID-WSFsecurity06.pdf>

The Liberty Alliance Board, which is the steward for Liberty Alliance Final Specifications, has approved a motion to enable further development of the ID-WSF and all of its supporting documents under the auspices of Kantara Initiative under the Kantara Initiative IPR Policy enacted by the ID-WSF Evolution WG.

Copyright in the above Specifications is held jointly by the Liberty Alliance member companies identified in the document copyright statements. Our Liberty Alliance Agreements grant, with board approval, copyright licenses needed to prepare derivative works, among other activities, as required by the ID-WSF Evolution Work Group IPR Policy. The IPR Policy of the ID-WSF Evolution Work Group is the [Kantara IPR Policy - Option Liberty](#) IPR Policy, which meets the requirements of the Liberty Alliance Board. Thus we believe that all of the necessary conditions for a proper Contribution as shown in the IPR Policy are met.

The Liberty Alliance Membership Agreements also provide for Liberty Alliance members to grant patent licenses to all parties under at least fair, reasonable and non-discriminatory terms, if such licenses are required to implement the final Liberty Alliance specifications. Further information on specific disclosures which may have been made by Liberty Alliance members is located on the Liberty Alliance web site and in the actual documents.

Please let us know if there are any concerns or questions about this submission.

Thank you.

Hubert Le Van Gong
