

UMA-ConformanceIssues

Conformance Issues UMA 1.0 Core protocol

Issue	Step Core protocol testcase	UMA-segment
Shouldn't resourcing be required, and NOT optional	Step1Substep4	
Resourcing still in development, not stable yet	Step1	
host sends XRD via POST-message to AM with description		
managed auth. User's sources at host	Step1Substep4	
Time-limits user-authorization are revoked, range timeli	SubStep4Branch2,3,4	
This step is based on an implentor's configuration		
example, how can this step be made independent of		
this example?	Step1Substep1	
Dynamic registering still in development, not stable yet	Step1Substep2	
	Step1Substep2 for all 3	
Discovery client registration endpoint, in development,	client registration flows	
Dynamic Registration Flow3: Native application Client		
Registration , not stable yet	Step1Substep2	
Not described how the authorization negotiation ends		
when the requester is NOT authorized according to		
user policy, when requester tries to get a access token		
from AM	Step2Substep3	
AM gives another claims-derived response other than		
the claims-required list asked by the requester, how		
can this be incorporated so it can be implemented?	Step2Substep3	
No description available errormessage if type claims-		
document can NOT be recognized by AM	Step2Substep3	
Core step 3 requirements incomplete; can't make defini	Step3	
requester presents to host request access token		
(issued by AM in Core Step2) by means of process		
has to be further explained in the Step	Step3Substep1Branch1	
Missing description host proceeds/not proceeds on		
result requester presents to host request access		
token	Step3Substep1Branch1	
	Step3Substep3Branch2-	
Are the errorresponses her as the ones described in the6		
Missing: Conformance requirements document for		
adequate testcase development	Step1,2,3
