Consent Receipt Usability and Accessibility Project

Work project to determine approaches to specifying usabiity and accessibility recommendations for implementation of consent receipts, and development of those specifications. Includes topics like user experience, user interface, web content usability, accessibility standards.

This work commences in October 2018 during the weekly Consent & Information Sharing WG.

The following link to lead to the existing User Experience pages in the Kantara - IDEF wiki https://wiki.idesg.org/wiki/index.php/Category:User_Experience

Sub-topics for exploration

- Presentation specs and 'skinning'
- Usability and Accessibility Standards and Resource Links
- User Experience
