

# Consent Receipt v1.1 update schedule

The WG is trying out a new way to organize the work on Consent Receipt v1.1. We are using the concept of "Sprints" from the Agile world, along with github issues and comments.

The issues backlog is here: <https://github.com/KantaralInitiative/CISWG/issues>

The general schedule for the work is represented in the diagram (click for a larger view). Issues are selected from the overall backlog and scheduled for specific Sprints, using the "Milestone" feature of github.
