

# 2019-02-21 Meeting notes (CR) DRAFT

## Date

2019-02-21

## Status of Minutes

DRAFT

Approved at: <<Insert link to minutes showing approval>>

## Attendees

### Voting

- [Andrew Hughes](#)
- Jim Pasquale
- Oscar Santolalla
- John Wunderlich

### Non-Voting

- Sneha Ved
- Sal D'Agostino
- Colin Wallis

### Regrets

- Mark Lizar

## Quorum Status

Meeting was <<<>>> quorate

## Voting participants

[Participant Roster \(2016\)](#) - Quorum is 6 of 11 as of 2018-11-19

Iain Henderson, Mary Hodder, Harri Honko, Mark Lizar, Jim Pasquale (C), John Wunderlich (VC), Andrew Hughes (VC), Oscar Santolalla, Richard Gomer, Paul Knowles, Samantha Zirkin

## Discussion Items

Time	Item	Who	Notes
4 mins	<ul style="list-style-type: none"><li>• Roll call</li><li>• Agenda bashing</li></ul>	<a href="#">Andrew Hughes</a>	<ul style="list-style-type: none"><li>▪ Deferred: Status: Wiki refresh work</li><li>▪ Deferred: Status: Distribution-version of slide deck describing the work here (consent receipt today personal data processing receipt tomorrow - or whatever we decide)</li><li>▪ Discuss EIC demo and scheduling</li><li>▪ Discuss proposal for specification extension approach</li></ul>

5 min	<ul style="list-style-type: none"> <li>Organizational updates</li> </ul>	All	<p>Please review these blogs offline for current status on Kantara and all the DG/WG:</p> <ul style="list-style-type: none"> <li>Director's Corner: <a href="#">2019: January</a></li> <li><a href="#">Work + Discussion Group Activity</a></li> </ul> <p>There is a wiki page that will hold all the known <a href="#">implementations of Consent Receipts</a> - Please update the page or inform Jim, or John, or Andrew of your implementation.</p> <ul style="list-style-type: none"> <li>TIIME, Vienna, February</li> <li>EIC, Munich, May</li> <li>Identiverse, Washington, June</li> </ul>
10 min	Product roadmap for the demo	All	<ul style="list-style-type: none"> <li>Target is EIC May 2019</li> </ul> <p><a href="#">Here's the project page for the "Demo v2"</a></p> <p><b>Go to the demo v2 page for the breakdown of roles and functions for 2019-02-21 call</b></p> <p>=====</p> <p><b>THESE NOTES ARE FROM 2019-01-31 CALL AND ARE DIRECT-EDIT-UPDATED FROM 2019-02-07 CALL</b></p> <p>Andrew's personal opinion on what to highlight:</p> <ul style="list-style-type: none"> <li>The fact that giving the person tools necessary for them to keep records (the 'receipts') about their data controller &amp; personal data processing interactions is a new thing in the world</li> <li>The ability for the person to take action because they have these records in their possession - the Privacy Control Panel</li> <li>The fact that interoperability standards allow many products to work in an 'ecosystem' way</li> <li>Even if the audience does not believe that the lawful basis of consent will become a mainstream thing, the person-side record keeping idea is a good one that has broad applicability</li> </ul> <p>Comments:</p> <ul style="list-style-type: none"> <li>This opens the door to ongoing management of the relationship by the person with the data controller/other</li> <li>The consent receipt is also a Notice</li> <li>People have an independent record of the interaction in the receipt</li> <li>Have hard receipts gone away because they are viewed as 'too much friction'? Is this dangerous?</li> </ul> <p><b>Decisions needed:</b></p> <ul style="list-style-type: none"> <li>The specific set of user stories we want to showcase - what is the "Consent Journey" of the person?</li> <li>The roles that each product will cover in the demo</li> </ul> <p>Comments (2019-02-14):</p> <ul style="list-style-type: none"> <li>Jim spoke to Gavin (CTO) - apps in the digi.me ecosystem are able to signal to the 'right to erasure' API because the 3rd party app knows the person, digi.me knows no people in the system</li> </ul> <p>Comments (2019-02-07):</p> <ul style="list-style-type: none"> <li>Jim: all should work on the Export function to allow others apps to view</li> <li>Andrew: what are we able to show that tells the audience that there is something new coming to the world - where people can see the receipts and take an action that is recognized and acted on at a data controller.</li> <li>The Control Panel idea is powerful <ul style="list-style-type: none"> <li>Maybe the user click transfers control over to the receipt issuer's app</li> </ul> </li> <li>In digi.me ecosystem there is an app that allows the user to look into their private library <ul style="list-style-type: none"> <li>there are 3rd party apps - these 3rd party apps use the digi.me APIs and issue the Kantara-compliant consent receipts.</li> <li>The receipt is shown in the user's digi.me management console</li> <li>So, if the user takes an action on that receipt in the digi.me management console, the 3rd party app receives the signal and can act</li> </ul> </li> <li>digi.me: <a href="https://developers.digi.me">https://developers.digi.me</a> and <a href="https://developers.digi.me/consent-access">https://developers.digi.me/consent-access</a></li> <li>Peter to sketch up a rough sequence</li> </ul> <p>Comments (2019-01-31):</p>

			<ul style="list-style-type: none"> <li>• The discrete functions need to be identified</li> <li>• Receipt issuers should be enrolled in advance (data controller should be known)</li> <li>• Can we show multiple wallets that hold receipts?</li> <li>• <b>Should build on the flow of the Demo v1 - person does stuff, gets receipts, sees them, acts on them</b></li> <li>• Is the 'wallet' (a.k.a. the receipt storage location) singular or multiple? <ul style="list-style-type: none"> <li>• Sphere app can display receipts from their own storage locations</li> <li>• Digi.me only shows receipts within their system <ul style="list-style-type: none"> <li>• Jim is pushing engineering towards the idea that the 'control panel' should be able to work on receipts in other app storage locations</li> </ul> </li> </ul> </li> <li>• <b>Passing control over a receipt (to act on a receipt and manage it going forward) to a 3rd party breaks the security concept of digi.me and Sphere's apps</b> <ul style="list-style-type: none"> <li>• Exporting a receipt is possible, but action on the exported receipt might require a redirect back into the Sphere app</li> <li>• This is probably the same with all app ecosystems</li> </ul> </li> <li>• Jan - looking at the topic of using the receipt as a data schema but also using the universal namespace/identifiers (a.k.a. Decentralized Identifiers) to reference the entities and object might allow for broader interoperability</li> <li>• <b>Peter: we lack the protocols for operations on the receipts themselves - maybe do this in Kantara</b></li> <li>• Jan - last week call - Paul and Jan presented on the Hyperledger Indy work for interop</li> <li>• <b>Remember that we are limited by what exists today - a list of JSON files</b> <ul style="list-style-type: none"> <li>• <b>The 'take action' function might be a simple "open URL in the receipt issuer's app"</b></li> </ul> </li> <li>• Action: Andrew to draw an information flow diagram for discussion for the demo</li> <li>• Action: ALL - to think about the functionality that your products can do today in light of the "Privacy Control Panel" idea - we will try to do a heat map to try to sort out role assignments and find gaps</li> </ul>
20 min	Approach to "extension kit"	Mark	<p>I have start a wiki page for working on a consent receipt extension and was thinking of trying to work on the document outline during the call tomorrow and just get a basic set of steps for the work effort to complete a simple scope. .</p> <ol style="list-style-type: none"> <li>1. Draft &amp; Review extension Outline</li> <li>2. Walk through use of extension</li> <li>3. Recommend extension</li> </ol> <p>Here is the link - <a href="https://kantarainitiative.org/confluence/pages/viewpage.action?pageId=104600510">https://kantarainitiative.org/confluence/pages/viewpage.action?pageId=104600510</a></p> <p>Meeting notes</p> <ul style="list-style-type: none"> <li>• Approach to mapping the CR to a specific law/regulation and ensuring that the terms/fields are correct for the specific law <ul style="list-style-type: none"> <li>• Then, replacing the terms in the specification to create a law-specific specification</li> </ul> </li> <li>• Try this out on CFR 42 - a healthcare regulation in US that requires explicit consent - on top if HIPPA - which did not cover explicit consent <ul style="list-style-type: none"> <li>• HIPPA has a 'burden of proof' requirement</li> </ul> </li> <li>• Discussion about interoperability between domains, parsing and</li> </ul>
Deferred	Specification update approach		<ul style="list-style-type: none"> <li>• Discovery approach leading to backlog leading to prioritization?</li> <li>• How do we decide what changes we must do in this round versus deferrable changes?</li> <li>• See <a href="https://github.com/KantaraInitiative/consent-receipt-v-next">https://github.com/KantaraInitiative/consent-receipt-v-next</a></li> </ul> <p>See a flowchart version of this here:</p> <p><a href="https://share.mindmanager.com/#publish/b-DWOcuKGnVY1PXBKXTpL0-DQOeqmZMGfGUAPiC5">https://share.mindmanager.com/#publish/b-DWOcuKGnVY1PXBKXTpL0-DQOeqmZMGfGUAPiC5</a></p>
5 min	AOB	Sneha	<ul style="list-style-type: none"> <li>• Update from Sphere Identity about ID4D challenge <ul style="list-style-type: none"> <li>• "How could an identity solution work for 1 Billion people"</li> </ul> </li> </ul>
	Next meeting		<p>*** Next call 2019-02-21 10:30 am Eastern Standard Time / 15:30 GMT</p> <p><a href="https://global.gotomeeting.com/join/323930725">https://global.gotomeeting.com/join/323930725</a></p>
