This Kantara DG launched on July 5, 2016 and wrapped up final work on its Report on June 5, 2017. The Report offers recommendations and observations to Kantara regarding solving use cases for empowering traditionally disempowered parties (such as individuals) to "contract and transact" e.g. with parties that traditionally hold greater power (such as companies and large countries), given the new landscape of decentralization and distributed technologies and techniques and their mixture with identity. You can find it at <http://tinyurl.com/bscdgreport>.
