SMART project user experience

The Newcastle University SMART project is working on an implementation and a user interface. Following are screenshots from the authorization manager interface.

These are now historical. See the SMART FAQ for up-to-date information about the SMART project.

Alice logs into smartam

Alice confirms the introduction of a host to smartam
Alice arranges for UMA protection of some resources at **smartam**.

A record of the resources being protected by **smartam**:

- **Photo album**: Moscow trip photos
  - Protected Resource name: Moscow trip photos
  - Resource URL: http://www.sfs.com/alice/photos/moscow
  - Protected on host: Secure File System

[Diagram showing protected resources and resource details form]

**Note:** The screenshots in the document illustrate the interface of the **smartam** tool, showing how resources are managed and protected.
