

Product Roadmap for Kantara 'User agreement' Receipt Concept

A page to contain material related to discussion of Consent Receipt product roadmap and next versions

By	Comments	Links	Posting date
Andrew Hughes	<p>I have written a blog post about thinking of the general 'data agreement' concept when discussing next versions of the Receipt spec.</p> <p>Also, attached, I have described some high level use cases that might also be interesting to discuss.</p>	<p>Blog: Kantara Initiative Work Groups on Data Sharing and Consent</p> <p>Mind map to go with the blog</p> <p>Kantara consent high level use cases.pdf</p>	2018-10-31
Andrew Hughes	<p>A new flowchart that shows activities related to an individual and service provider entering into an agreement. The idea here is that for any use case that the WG wants to analyse, we should be able to discuss requirements and details for each box in this general flow chart, and refine it to suit the use case.</p> <p>(2019-03-28) Note that this initial flow chart does not imply that personal data is involved- it is just a starting point. Additional flow chart versions that incorporate actions related to data flows will need to be created.</p>	<p>https://share.mindmanager.com/#publish/NEsOqlqyWZ2buLfrGpDytSBf9KO1pQpZZMM4J0PS</p>	2018-11-15
