

Obsolete Specifications and Auxiliary Documents

Obsolete Specifications and Auxiliary Documents

Obsolete specifications and auxiliary documents produced by the Work Group are collected under this page. Some notes on these documents:

- **User-Managed Access (UMA) Claim Profiles Framework** ([latest version](#), pretty-printed) ([most recent IETF I-D](#), possibly somewhat out of date wrt the KI version)
- [Claims 2.0](#) and [Simple Access Authorization Claims](#) (obsoleted by Claim Profiles, itself obsolete)
- [Legal Considerations](#) (obsoleted by Binding Obligations)
- [Lexicon](#) (obsoleted by the spec itself and Binding Obligations)
- [UMA Trust Model](#) (obsoleted by Binding Obligations)
- [UMA User Stories](#) (obsoleted by Case Studies)
- [OAuth Dynamic Client Registration Protocol](#) (obsoleted by the OAuth WG's own standards-track [specification](#), to which UMA core now refers)
- [UMA Resource Registration](#) (obsoleted by the now spun-off OAuth Resource Set Registration spec, itself later promoted to Recommendation status and about to be obsoleted by UMA V2.0)
