

Non-chrome Login Button

Abstract

This document is a product of the [Universal Login Experience Work Group](#). It records our experimentation with the idea of a non-chrome (i.e. not part of the browser chrome) universal login button.

Status

This document is currently under active development. Its latest version can always be found [here](#). See the [ulx:Change History](#) at the end of this document for its revision number.

Non-chrome login button as displayed by id-enabled browser

First attempt at a button is shown below. We're showing is how the non-chrome button (the one in the middle of the Web page) is visually similar to the in-chrome button. Most users (using unmodified browsers) will only see the non-chrome button. Only users with an id-enabled browser will see both.

Warning Notice

This is a U.S. Government computer system, which may be accessed and used only for authorized Government business by authorized personnel. Unauthorized access or use of this computer system may subject violators to criminal, civil, and/or administrative action.

All information on this computer system may be intercepted, recorded, read, copied, and disclosed by and to authorized personnel for official purposes, including criminal investigations. Such information includes sensitive data encrypted to comply with confidentiality and privacy requirements. Access or use of this computer system by any person, whether authorized or unauthorized, constitutes consent to these terms. There is no right of privacy in this system.
