

ULX Teleconference 2010-07-12

[Logistics](#) | [Discussion](#)

Logistics

- **Time:** 11:00-11:30 Eastern
- Skype: +9900827042954214
- US Dial-In: +1-201-793-9022
- Room Code: 295-4214

Discussion

1) Roll Call

1. Paul Trevithick
2. Nate Klingenstein
3. Scott Cantor
4. Benoit Bailleux
5. Jonas Hogberg

This was not a quorate meeting.

2) Minutes

We did **not** approve the following minutes:

- <http://kantarainitiative.org/confluence/display/ulx/ULX+Teleconference+2010-06-21>

3) Review v4 mockup

We reviewed [NIH Scenario Web Mockup](#) v4. We concluded we wanted to make the following very minor tweaks:

1. Where it says "or sign in with 1 of the XXX accounts below", let's delete the "XXX" number
2. After logging in the first time, the next time a very small favicon/image is added to the right of the word "Sign In" --this should be deleted

Otherwise, we felt that the prototype was in very good shape.

4) Next steps

We felt that the next step involved specing out an XRD that would capture the list of "inputs" that code implementing the prototype (esp. the un-modified browser case) would use to drive the UI.

We had a brief, inconclusive discussion of how this XRD might relate to the XAuth.org work.
