We are undertaking some important new work on an UMA "policy manager" extension, and more. You can check it out by reading our **Meetings and Minutes**, and if you're interested to contribute, be sure to click our Join link above!

Here are the UMA Grant (PDF, HTML for deep linking) and UMA Federated Authorization Recommendations (PDF, HTML for deep linking). Don't miss the **UMA2 masterclass** delivered by two UMAnitarians at the Identiverse conference in Boston in June 2018 (slides and video). (The slides and video from the previous year's **Authorization: Age of UMA** session set in the Marvel Cinematic Universe was also a big hit!) The Release Notes review all final UMA1-to-UMA2 changes. See also the UMA Implementer's Guide, our list of known Implementations, and discussions of Case Studies. Finally, see the detailed UMA Grant sequence diagram and FedAuthz sequence diagram.

User-Managed Access (UMA) is an award-winning OAuth-based protocol designed to give an individual a unified control point for authorizing who and what can get access to their digital data, content, and services, no matter where all those things live. Read the specs, join the group, check out the implementations, follow us on Twitter, get involved!

The group is currently working on extensions to UMA V2.0.
