- Mark Dixon, Oracle (non-voting)
- Dervla O'Reilly, Kantara Initiative (non-voting)

Apologies

- Trent Adams, Internet Society (voting)
- Iain Henderson, MyDex (voting)

Quorum not met.

Agenda

Continue discussion on what it will take to get high assurance identity credentials into widespread use by consumers.

A preliminary list of criteria for deployment and adoption of high assurance identity credentials might start as follows:

- Incentives/motivation for service providers / relying parties to use strong authentication for protection of high value, consumer-facing accounts and resources.
- Business drivers for identity providers that can issue high assurance credentials to consumers.
- Need for rigorous identity proofing prior to issuing high assurance credentials, versus a need for strong authentication technology only.
- Authentication form factors that are usable and convenient for consumers to use.
- Consumer education / awareness.

Minutes

1. General discussion of criteria for deployment and adoption of high assurance identity credentials for consumers
2. Reiterated importance of usability/ease of use of identity technologies for consumers
3. Discussed pros and cons of banks, motor vehicle agencies acting as identity providers for digital consumer identities

Next Meeting
