

# Blinding Identity Taxonomy Report Draft

## Version 1.0

I'm pleased to share with the workgroup a draft of version 1.0 of the Blinding Identity Taxonomy Report. This will be coming up for review and voting following the Kantara process shortly, but the draft is now in a place where members of the workgroup can review and comment. The draft attached to this post has line numbers to facilitate comments. Please make your comments about this draft in the comments section of this blog post including a reference to the line number. I'm looking for typos, as well as requests for additions or deletions - remembering that version 1.0 is intended to be published as soon as reasonably possible to get the actual taxonomy into the hands of practitioners.
