2. Connect Profile & coordination with the OIDF Connect WG.

Miter cas produced a profile of Connect and OAuth for ONC, we want to have a look at that and align and/or give feedback to ONC.

The OIDF is working on certification deployment profiles for Connect that will be used for self certification.

The Mobile Profile WG at the OIDF has just started work and is dividing the initial work into three documents Discovery, Registration and Authentication.

3. SCIM 2

MS is looking for people to do interop testing with.

Call ended at 30 min in.

Members not on the call

- Jordan (Protiviti)
- Mat Tebo
- Nate Klingenstein
