(simple translation in English)

\*Seminar and Interview

Consensus

- the target audience would be interested in infrastructure development for enterprises/services, but not necessarily be tech experts
  - to ask Matthew-san to keynote in 80 minutes with consecutive interpretation and to balance IAF details and KI overview including JapanWG and ConcordiaDG
  - to share an estimated timetable among speakers
  - registrations will close now because seats are full
  - no Ustream this time
  - allow GakuNin to distribute their brochures at the seminar
  - no printed materials of presentation, in principle
  - asked for volunteers to share necessary tasks including support for speakers (Itoh-san), arrangement of interpreters (Kaneko-san), invitation for interview (Ikeda-san), reception and venue preparation (Yamada-san), facilitator (Itoh-san), openings and closings (Suzuki-san and Sakamoto)
- Thanks all!

\*The next teleconference will be Thursday September 16th 16:00JST
