Reiner moved Nate seconded adoption of the minutes.

2. Rainer's SAML extension [Working Drafts](#)

Discussion on refactoring the document. SMTP and consent need to be treated separately.

We need to consider if there is a better way to do this than requiring a 3rd party CA, perhaps key agreement might work.

John mentions using ECDH-SS but with the SP's static key being provided dynamicly in the Authn request. This would get around needing a 3rd party CA.

However it has the downside of using an algorithm not widely supported and on top of that twisting it slightly to use one time static keys.

Other algorithms for key agreement may also work (ECDH-ES but backwards where the encryptor is static).

The document was accepted as a WG document for further revision and possible submission to other appropriate standards bodies.

Moved Rainer and seconded by Collin

3. [Connect Profile & coordination with the OIDF Connect WG.](#)

No update

4. SAML2Int

Rainer wants to host Discussion at EEIC with REFEDS.

Scott to note down changes we should consider for updates of SAML2Int.
