

AdvCIS Project - and the ANCR WG proposal for 2021

Scope:

Community Liaison co-ordination, inviting, trade associations, Standards Development Organisations, to collaborate on unified interoperable notice and consent data vocabulary controls, and records for personal data control.

Leadership

Co-Chair - Mark Lizar - Leading (open source) Notice and Consent Gateway project at OpenConsent and Smart Species Canada

Co-Chair - Sal D'Agostino- Leading initiative for Notice Code of Practice for Consented Video Surveillance

Co-Chair - Vitor Jesus - Leading Trustless team at Birmingham City University - and the PaE- Consent Gateway project funded by EU for the Next Generation Internet

Committee Goal(s)

This Project is a working liaison on Consent Record works, focusing on combining inputs from multiple committees for input into ISO /IEC 27560 Privacy technologies: Consent record information structure - study period, for a unified input.

Compiling all the pending inputs into a complete notification governance standard or explicit Consent, with a maximum explicit consent use case for medical research, international interoperability, with a distributed ledger proof, consent receipt.

Including, an appendix with; notice, notification, and an explicit consent receipt types. As well as a consent interop appendix mapping legal justifications to consent and notice, with a unified data control vocabulary for a consistent cross domain types for people to understand.

bringing together multiple standards, from different communities, to be able to demonstrate standards based interop, with W3C, ISO, COEL, and UMA.

ANCR WG Roadmap (see proposed charter)

- v1.2 - Consent Notice Receipt - for explicit proof of notice and consent
- v1.3 - Notice Receipt Types

Transition Plan

We are planning on moving this work project to a new work group titled Advanced Notice and Consent Receipt (ANCR) Work Group. **The proposed charter is posted as a child page here.** It looks to build on the success of the consent receipt and take into account a number of recent developments in adoption of the receipt by solution providers and end-users as well as its update by standards development organizations.

Upcoming Events

ANCR WG aims to support international data governance interoperability in 2021 by participation in conferences and events.

- MyData Governance Landscape 2021
 - A Panel at My Data Global
 - Friday Dec 11
 - <https://online2020.mydata.org/programme-page/mydata-governance-interoperability-landscape/>
- International Data Privacy Legal Hackathon
 - January 28-29, 2020
