Regrets

#### 1. Discussion of Connect profile.

Mobile Profile WG now set up at OI DF for GSMA and others wanting a standard deployment profile.

OI DF meetings coming up before IIW, perhaps organize a joint session at IIW for Connect profile.

#### 2. SAML2INT rules for NotOnOrAfter.

**Guidance on session NotOnOrAfter use may be helpful so IdP don't mistakenly set it to 5 min.**

**We should look at how heartbleed may affect key management recommendations.**

John, Scott, and Nate will look over the profile and see what may need to be changed, and report back for the next call.

We should pull together the non controversial changes and get a update out.
