

Meeting Minutes 20 Feb 2014

Kantara FIWG Teleconference

Draft for Editing

Date and Time

- **Date:** 20, Feb, 2014
- **Time:** 13:00 PT |16:00 ET

Attendees

- John Bradley, Ping Identity
- Rainer Hoerbe
- Mat Tebo
- Scott Canter

Regrets

- Collin Wallis

Minutes from Feb 06 , 2014

- Moved Scott
- Adopted

1. Discussion of Connect profile

There is an updated doc for people to look at.

[OpenID Connect Profile \(Code only\)](#)

2. Rainer's Extended Schema validation rules

Rainer published a project on github that defines additional schema validation rules for SAML metadata files. Currently there are 36 rules that do things like:

- require an x509certificate element;
- require an EntityCategory of a specific value out of a predefined list;
- issue various warnings if useful extensions, organization or contact elements are missing.

URL: https://github.com/rhoerbe/saml_schematron

There is a rudimentary set of rules for the saml2int profile.

Scott suggests reaching out to Ian Young for feedback.

We can consider publishing schema validation rules for saml2int meta data.

Those of us at REFEDS in Dublin can further discuss this.
