

# UMA WG Update

- The work group has been reviewing the UK Pensions Dashboard profile contribution, both the contents and IPR concerns
- The work group has been discussing the FAPI project: If we can/should recommend the same security profile to implementors, and if we should contribute a UMA profile for consideration by FAPI
- The work group presented to all members during the monthly Leadership Council call. Highlighted two upcoming deployments (UK Pensions Dashboard and an Ontario trusted account for health) and how those deployments are bringing profiles and work back to the group
