

FIWG Meeting Minutes 2011-04-14

Attendees:

John Bradley
Scott Cantor
Rich Furr
Leif Johansson
Chris Leggett
Matt Tebo
Mary Ruddy

Apologies:

Hank Mauldin

Staff:

Anna Tickin

Meeting Minutes:

1. ADMINISTRATIVE:

- Roll Call
- Reminder of Motion of Minutes Approval 31 Mar 2011
- Moved: Rich Furr
- Seconded: Matt Tebo
- With no discussion or objection, the minutes are approved as recorded.

2. TFMM Work Group Update

- The TF MM WG has launched and is now taking on members.
- Its first telecon is targeted for the F2F in Berlin. Dial-ins will be made available.

3. IANA Registry for LoA Identifiers

- Updated link : <http://tools.ietf.org/id/draft-johansson-loa-registry>
- Reminder : this is an Informative registry for the purpose of discovery.

4. White Paper---Bob Morgan

- This item will be carried over until John has a chance to connect with Bob for an update.

5. MDX Update

- Scott loosely suggests a Shibboleth V3 SAML IdP 2012 release seems probable if scope-creep can be minimized. It will support making MDX queries.
- There is also someone in the Shibboleth project working on a MDX provider for their data validation module.
- Actually PEER is a collaboration between WAYF, InCommon, SWAMID, ISOC and Terena. The project is contracted to have a front end built for Leif's MDX implementation.
- Leif confirms the Czech team has probably been testing it against HSMS

6. AOB

- The WG discussed Federation Operators and federated meta data regarding multiple actors; specifically regarding relationships between Kantara, OIX, FICAM and Safe BioPharma.
