- **Action Item Review:**
- Leadership Nominations---Closed
- 20100617-01 Scott Cantor---Closed
- Leadership Vote - Closes July 2

2. Call for volunteers for work group secretary---NONE

3. Use Cases

- None have been posted. Members are reminded to post desired use case(s) to the mail list.

4. Discussion of Scott's input:

<http://kantarainitiative.org/confluence/display/fiwg/SAML+Metadata+Tech+Notes>

- No specific comments.
- Discussion took place to explain potential relationship consideration to MDX spec. Advantage of MDX is that you can download a subset of metadata to your needs.
- Issues explained around multiple trust anchors. Relates to ICAM SAML 2.0 profile where ICAM collects meta-data and re-purposes it so that RPs only need to trust one end point.
MDX is really an implementation tool that makes using multi-protocol tools easier across communities.

5. Entity naming issues.

<http://kantarainitiative.org/confluence/display/fiwg/Entity+Naming+Conventions>

Discussed concepts around naming "forever" should not include something that will change or go away in x time understanding that the name would stand until an entity got acquired or otherwise. Discussion around who assigns the names---specifically an over-arching org or the entity themselves.

6. AOB

None
