

# CR2.0 Fields Revision

Freely input your requirements for new fields, and modification to existing ones.

Please add your name so clarification can be sought, and initials. If the comment pertains to the wider spec, a comment to the page is probably more useful.

Contributor	Field	Rational	Community Comments	
VJ	Receipt-sub-ID or previous-receipt-id"	A level down the receipt-id so several receipts can be linked to each other under a generic transaction. This is to support transactions and context; alternatively, a "previous-receipt-id" so that receipts can be linked together and establish an underlying context of referrals.	<ul style="list-style-type: none"> <li>▪ Definitely a GAP - sub-id- Nesting - referencing protocol for constant - sub-id- nesting</li> <li>▪ Harsh -Not a good idea- for new consent records or changes</li> <li>▪ Sub-id Notifications</li>   <li>▪ Consent Record</li> </ul>	Use case - site the id's of a consent receipt for breach notification -
VJ	authz-token	which should be kept fairly secret between the Controller and Subject that allows the receipt to be used as a bearer token that uniquely identifies and authorises the bearer as owner of the personal data.		
VJ	control-url	to provide a recorded point of contact to the Data Controller. I am imagining a URL that Subjects can use to, e.g., request deletion of their personal data or simply to revoke consent. It does not have to be a URL, of course, and could some other locator or identifier
