Summary of service:

IDVerse is a fully orchestrated identity verification (IDV) platform delivered as a single-tenant AWS hosted SaaS. It is designed for enterprises that require data isolation, advanced customisation, and maximum control over their digital identity verification environment. The service enables organisations to authenticate government-issued identity documents, verify biometric liveness, and establish trusted digital identities in compliance with global regulatory and security frameworks. The technology is 100% proprietary.

The service can be accessed via: www.risk.lexisnexis.com/products/idverse

The authenticity of this certificate can be verified via: [Kantara Certified Client List](#)
