in the role of:

For application in the following **N/A**
Supplementary codes

Summary of service:

IDscan Enterprise analyses input data, including the user's photo ID and eChip data, as well as location information. It verifies the presence of the identity subject by comparing it to the extracted Identity record from the photo ID or eChip data. This verification process involves liveness verification and facial matching, resulting in a verified user record for use with approved digital services.

The service can be accessed via: <https://www.gbg.com/en/>
